

The **eXpressIT!** system is a unique web-based solution, which seamlessly integrates multimedia communication, collaboration, and presentation functionality in an intuitive, streamlined interface. Operating exclusively within the browser, virtually no software is required for special download or configuration. Furthermore, as an integrated web utility, the system is inherently scalable, capable of supporting nearly any number of concurrent users.

The screenshot displays the eXpressIT! web interface within a Microsoft Internet Explorer browser window. The interface includes a navigation menu with options like 'Learn', 'Share', 'Test', 'Admin', and 'Help'. A central 'Express Chat' window shows a user named 'ecanner' with a 'Hello' message. On the right, there is a 'Presentation Builder' section with a 'Submit' button. A video feed of a woman is visible on the left side of the interface.

Harness the power of the control panel, the Presentation Builder, an integrated client-to-client and group whiteboard, and extensive communication abilities including LIVE audio and video conferencing. All of this and more with the eXpressIT! system!

Major Interactive & Multimedia Features of the eXpressIT! System:

A. Communication

1. **Chat:** Text-based user interchange supporting real-time group and individual messaging.
2. **Instant Messenger:** Stand alone messaging system, which may run as a background application.
3. **Audio (PC Telephony):** Full duplex, two-way or group (IP) conference call option.
4. **Video (conferencing):** Multi-user, real-time video conference utility.
5. **VMail:** Send voice or video e-mail with no special hardware or software installation.

B. Collaboration

1. **Co-Browser:** Client-to-client (or to group) sharing application for URL, file, and media resources.
2. **Whiteboard:** Full-featured (group) annotation function overlaying all shared resources.

C. Presentation

1. **Presentation Builder:** Design wizard enabling rapid presentation construction and deployment online.
2. **Presentation Library:** Compilation and navigation of all user-accessible presentation content.

End-user subscriptions

A basic subscription begins at \$9.95/month and allows unlimited access to the system with 200 minutes of (audio) 'talk' time. Other pricing plans are available (see Pricing Schedule or contact a sales representative for details) with additional audio and video conferencing time, specifically, priced at a fraction (typically under \$0.05/minute) of traditional equivalents.

Vertical Market Licensing

Exclusive geographic and/or market territories can be established, whereby all sales activity within the scope of the particular domain can be directed solely through a designated dealer.
